<b>Office Action Summary</b>	<b>Application No.</b> 10/585,102	<b>Applicant(s)</b> BERNSTEIN ET AL.	
	<b>Examiner</b> Max Noori	<b>Art Unit</b> 2855	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election Acknowledgment***

1. Acknowledgment is made of the election of group I claims 31-39 and 45-50, without traverse, the non-elected claims 40-45 are withdrawn from the consideration. The non-elected claims should be canceled by the Application during the prosecution of this application.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 38 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms “said first rotary member” and “said second rotary member” have no antecedent basis.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2855

5. Claims 31, 45, are rejected under 35 U.S.C. 102(b) as being anticipated by de Halleux.

Regarding claim 31, de Halleux discloses an ultrasonic process for measuring stress in a bolt, with features of the claimed invention including steps for transmitting a cyclically-repeating acoustical wave through a transmission channel in said connecting body from a first location thereon to a second location thereon; measuring the transit time of said acoustical wave through said transmission channel from said first location to said second location; and utilizing said measured transit time to produce a measurement of an external stress (or force).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 32-33, 37-38, 46-47, are rejected under 35 U.S.C. 103(a) as being unpatentable over de Halleux.

Regarding claims 32-33, 37-38, de Halleux recites a fastener means, which is generally used for coupling two moving or rotating devices together, but he did not show a plate, however such procedure can be applied to any related application.

Therefore, it would have been obvious for a skilled artisan at the time of the invention to modify de Halleux to provide a plate as opposed to a bolt. Because the process can be

Art Unit: 2855

equally applied to any arrangement of desired interest, and the mere application of the process does not substantially changes the steps of the method claim.

8. Claims 34-36, 39, 48-50, (for the specifics of the fixation points, rotary members, fiducila points, and fastening plates) are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 P.M.
